

**Non Graded Lab Assignment 1 – CSN451 Server-Side Engineering
ODD Semester, 2026-27**

Student Name: Yashi Gupta
Major:BTCSE

ID:1000020665

Instructions

- There is 01 question in this assignment.
- Email/paper/other modes of submissions will not be accepted.
- Upload a word **version** of this document.
- Assignments submitted after the due date will not be evaluated and a score of zero will be awarded.
- Plagiarism may lead to an award of zero marks.

Due Date and Time: 31-08-26, 5.00 AM

You will submit (upload) this assignment in LMS. Name this document as NGLA1_SSEODD2026_John_Doe.doc in case your name is John Doe, and this graded lab assignment is 1 of course whose acronym is SSE and offered in ODD 2026. Paste your code after each question, paste the screenshot of output, save and upload the document.

Grading Scheme: This assignment has 0 marks.

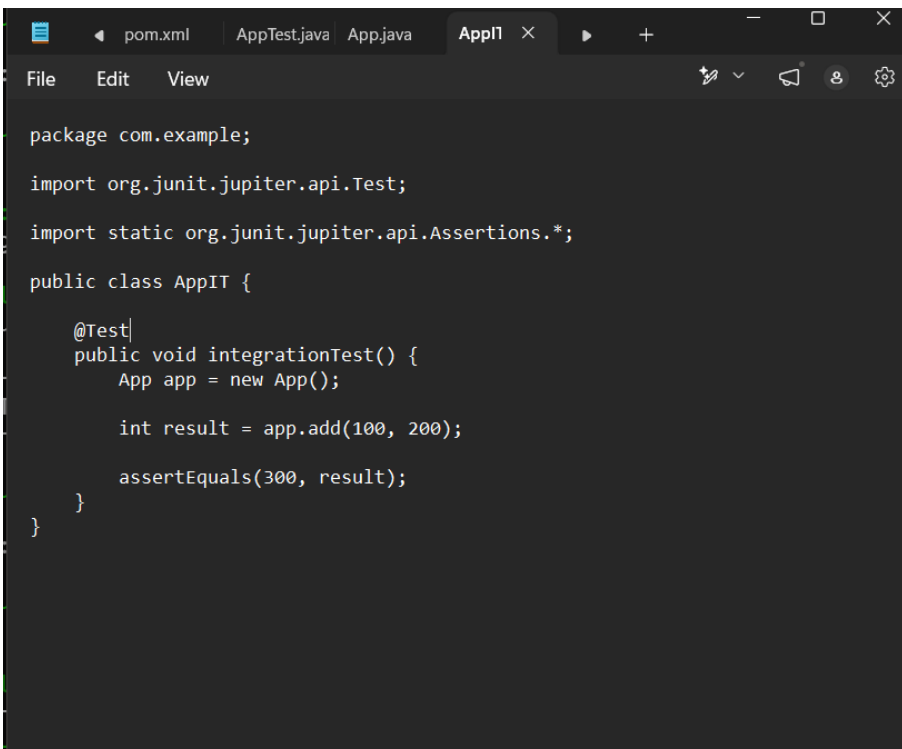

Question 1:

Running a Maven project for testing : unit and integrated

```

[INFO] Running com.example.AppTest
[INFO] Tests run: 4, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 0.061 s -- in com.example.AppTest
[INFO] Results:
[INFO] Tests run: 4, Failures: 0, Errors: 0, Skipped: 0
[INFO] -----

```

```

package com.example;

import org.junit.jupiter.api.Test;
import static org.junit.jupiter.api.Assertions.*;

public class AppIT {

    @Test
    public void integrationTest() {
        App app = new App();

        int result = app.add(100, 200);

        assertEquals(300, result);
    }
}

```

The image shows two screenshots of an IDE window, likely IntelliJ IDEA, displaying a Java file named `AppTest.java`. The window has tabs for `1 (!).env`, `superadmin pom.xml`, and `AppTest`. The menu bar includes `File`, `Edit`, and `View`. The code is as follows:

```
package com.example;

import org.junit.jupiter.api.Test;
import static org.junit.jupiter.api.Assertions.*;

public class AppTest {

    App app = new App();

    @Test
    public void testAddition() {
        assertEquals(10, app.add(5, 5));
    }

    @Test
    public void testSubtraction() {
        assertEquals(5, app.subtract(10, 5));
    }

    @Test
    public void testMultiplication() {
        assertEquals(20, app.multiply(4, 5));
    }

    @Test
    public void testEvenNumber() {
        assertTrue(app.isEven(10));
    }
}
```

The bottom screenshot is identical to the top one, showing the same code.
